Abstract of CN1065374

During the process of making foam wool, appropriate powdery water-absorbing substance and a powdered matter harmless to plant growing and having 3-8 times greater specific weight are added in. Finished foamed material is then torn off to obtain a foam substance with better water-absorbing and retaining capacities and greater specific weight. Besides the advantages said above, it is proper for fixing plant and stabilizing the pot in which plant grows if it is used in plant cultivation.
